

An earthquake can happen when I'm alone at home.

When there is an earthquake, the things around me or the place I have been can harm me.

Therefore, when there is an earthquake at home, I have to stay calm and do drop-cover-hold on action until the quake ends.

After the earthquake stops, I have to take my disaster and emergency supply bag, go out of the house and go to the assembly area.

My mother said that elevators were one of the most dangerous places during the earthquake. So, I have to use the stairs after the earthquake.

There may be tremors after an earthquake. Thus, I have to stay away from buildings.

When there is an earthquake, it is an important behavior to go to a safe place and drop-cover-hold on.

It is very important for my safety to go to the safe assembly area after the earthquake stops.
